

Press Release
Petcore July 4th 2007

In order to work for the PET value chain and to enhance its contribution to plastics waste management, Petcore has been restructured. It is now a more effective and responsive organisation. Based in a new location in Ave E Van Nieuwenhuysse it is developing the strength of its expertise, website and its large PET recycling database.

Combining the expertise of a very diverse membership the new Petcore will:

- Continue to facilitate sustainable growth for post consumer PET collection.
- Support all PET recycling processes as a key integrated part of European Plastics Waste Management initiatives.
- Validate and support through the Petcore Expert Evaluation Group, innovative PET solutions.

Members of the Petcore organisation will financially and practically support projects that facilitate the recycling of PET throughout the European PET value chain from feedstock to Recycling.

As a unique organisation, Petcore will actively work in conjunction with other major Plastics Associations across Europe to support initiatives in Plastics recycling. Petcore will assist in the facilitation of regulation taking into account the interests of its members.

Petcore would like to attract new members who can contribute proactively to the fulfilment of its objectives.

More information on Petcore and its work are available our website
